

PORTFOLIO WEBSITE

Project Overview

Personal developer portfolio website showcasing academic background, technical skills, AI/ML projects, and contact channels.

Problem Statement:	Presenting a clean online presence to showcase software projects to recruiters.
Solution Implemented:	Created a dark theme developer portfolio featuring project galleries and contact links.
My Technical Role:	Developer & Designer

Main Features & Technical Stack

Core Features:	Technologies Used:
- Clean dark theme design system with smooth navigation - Filterable project gallery showcasing web & AI applications - Contact section with direct email integration and resume download	HTML5, CSS3, JavaScript, Vercel
	Architecture Flow:
	Web Client → Vercel Global CDN

Technical Challenge & Results

Key Engineering Challenge: Ensured seamless mobile responsiveness across diverse device viewports.
Validated Results: Established an effective developer web portfolio.
