

EDTECH PLATFORM & CAREER ROADMAPS

Project Overview

Responsive online learning platform helping students explore career-oriented tech courses, guided learning roadmaps, and mentor profiles.

Problem Statement:	Aspiring developers struggle to find structured career paths amidst unstructured online tutorials.
Solution Implemented:	Architected an interactive EdTech platform featuring guided career roadmaps, filterable course tracks, and support counseling.
My Technical Role:	Full-Stack EdTech Architect

Main Features & Technical Stack

Core Features:	Technologies Used:
- Interactive course directory with filterable career tracks - Guided learning path visualization & syllabus roadmaps - Mentor showcase, student testimonials, and outcome telemetry - Integrated support counseling forms & guidance	React, Vite, JavaScript, Tailwind CSS, Lucide React, Express, Vercel
	Architecture Flow:
	React Client → Express API Gateway → Course Catalog Store → Vercel Host

Technical Challenge & Results

Key Engineering Challenge: Optimized nested course curriculum rendering with React memoization.

Validated Results: Delivered an intuitive platform streamlining tech career path discovery.
